Certificate: 21-C-0365  
Site: 001  
KRISTY WISNIEWSKI

Type: ROUTINE INSPECTION  
Date: Dec-02-2013

### 2.40 (a) (1) REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\* The facility still does not have an attending veterinarian or a written program of vet care available for review. Per this regulation, the facility must have an attending veterinarian and the formal arrangements with the vet need to include a written document which outlines health care management of the animals and indicates regularly scheduled visits by the attending veterinarian. Vet care needs to be addressed to assure the health care needs of the animals are being met.

### 2.75 (b) (1) REPEAT

#### RECORDS: DEALERS AND EXHIBITORS.

\*\*\* The records of animals on hand were still not available for review at the time of the inspection. These records need to be maintained in a timely and accurate manner at the facility for inspector review.

### 3.1 (a)

#### HOUSING FACILITIES, GENERAL.

\*\*\* Three dogs are housed in 2 old tiger enclosures. These enclosures are not being maintained and are in disrepair. There are several sections of the wood frame around the enclosure and around the shelter area that is chewed and now unsealed wood that is pervious to moisture. These areas of wood have rough edges and some of the wire mesh is also in disrepair. These dogs need to be moved to another enclosure that is maintained in good repair for their safety and well being.

Correct by: Dec 30, 2013

### 3.125 (a)

#### FACILITIES, GENERAL.

\*\*\* The shelter area for the wolf "Jerico" is in disrepair with a section of wood missing just to the right of the shift door. This shelter needs to be addressed and kept in good repair for the safety of the animal.

## Inspection Report

---

\*\*\* There is a section of chain link broken and protruding into the younger bear "Gus's" enclosure. This section of chain link needs to be addressed for the safety of the bear and to keep the enclosure in good repair.

Correct by Dec 23, 2013

### 3.127 (b)

#### FACILITIES, OUTDOOR.

\*\*\* The wooden boards are not up around the bear den area which is allowing wind and drafts to come into the den. This does not provide adequate protection for the bears when they are trying to hibernate for the winter months. In addition hay or bedding should also be provided for the bears comfort during this time.

\*\*\* The lions need to have bedding added to their shelter boxes for the winter. It was 34 deg F at the time of the inspection and due to the extreme cold this area gets during the winter months, the animals need to have bedding to allow them to stay warm and dry. This needs to be addressed for their comfort and well being.

Correct by: Dec 10, 2013

### 3.131 (a)

#### SANITATION.

\*\*\* The tiger shelter box adjacent to the bear enclosure needs to be cleaned. There is multiple days worth of old food and bones that needs to be removed to keep the area clean.

\*\*\* The bear den has an accumulation of feces in the corner that need to be cleaned. These areas need to be cleaned as often as necessary to prevent contamination to the bears and to reduce odors.

Correct by: Dec 10, 2013

An exit briefing was conducted with a facility representative at the time of the inspection.
